EU Universal

UMEI

Linking active system management to flexibility markets

EU Universal
UMEI

InnoGrid 2023

Session 3 - Cooperation

Pedro Marques

E-REDES

EUniversal is coordinated by E-REDES, involving 19 partners, including cooperation between DSO and market platforms/FSP

DSO

(including:

west**energie** + E.On Impulse GmbH as LTP)

Market/aggregator

Research

Association

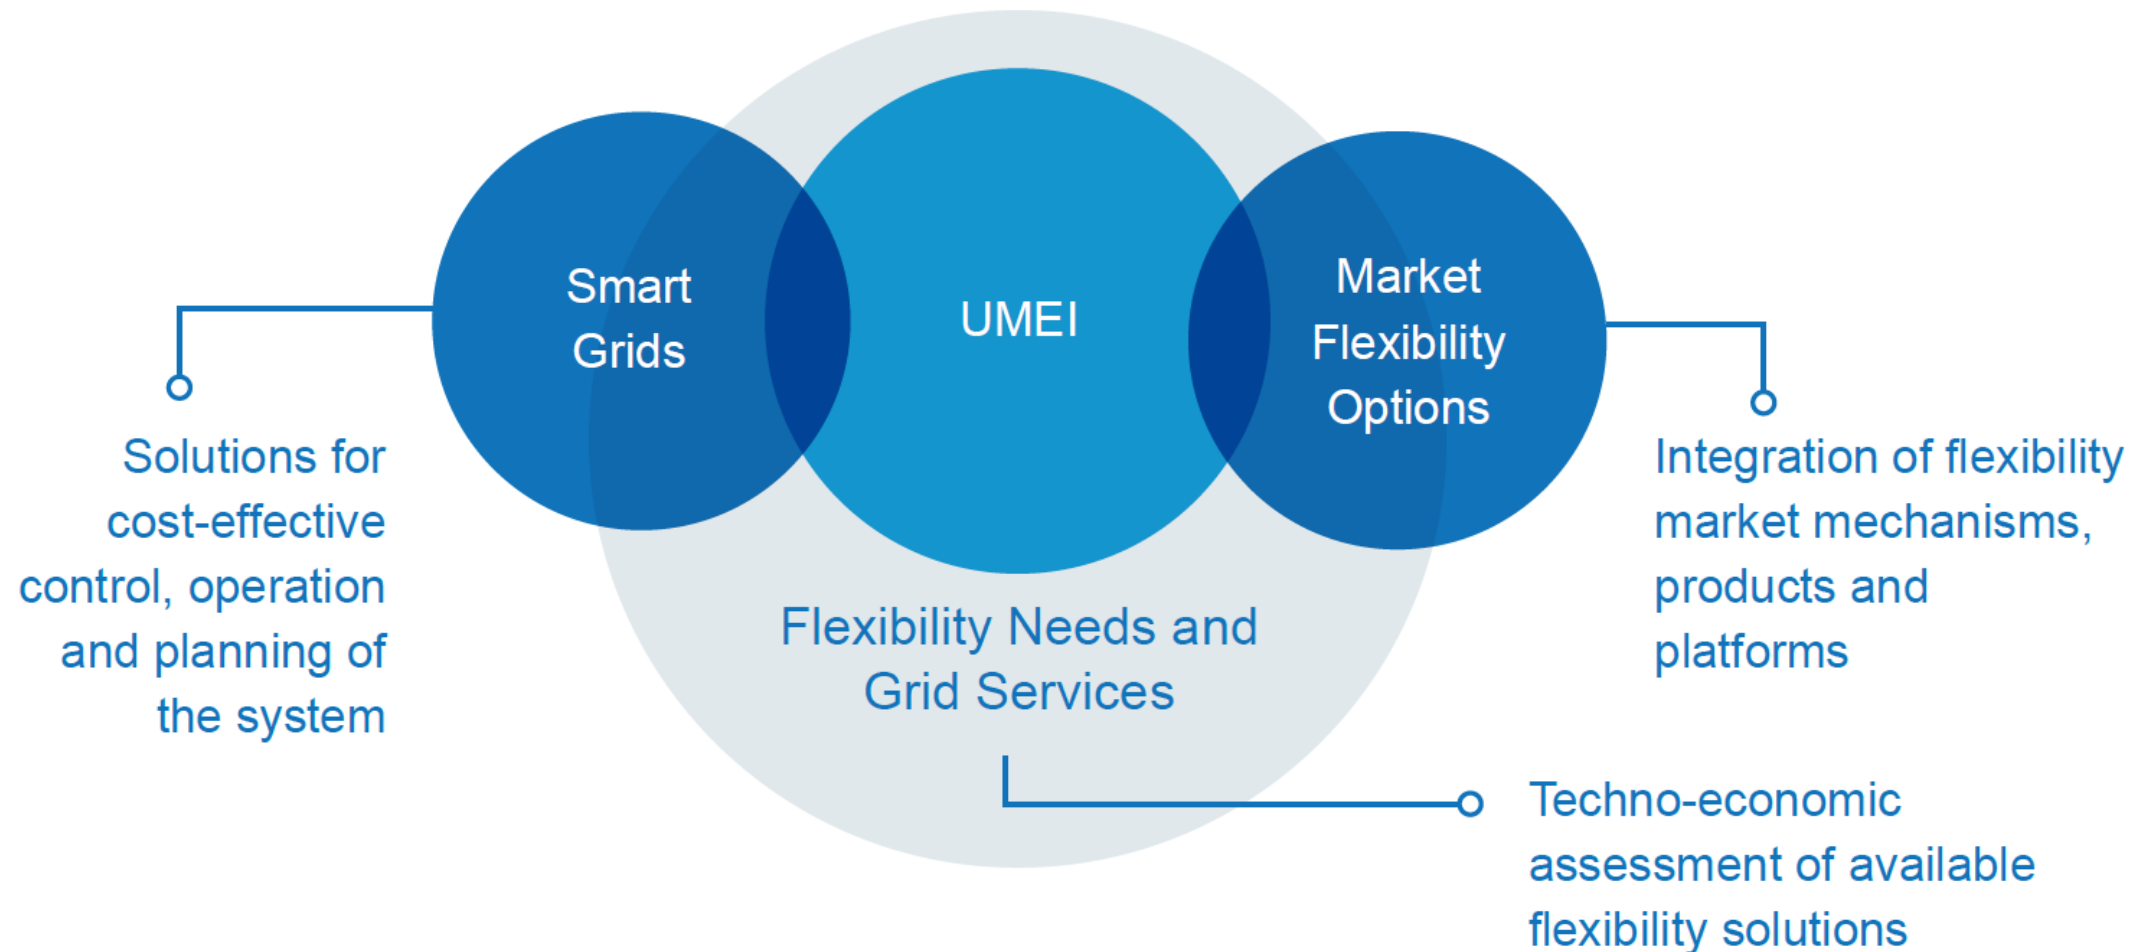

Solution provider

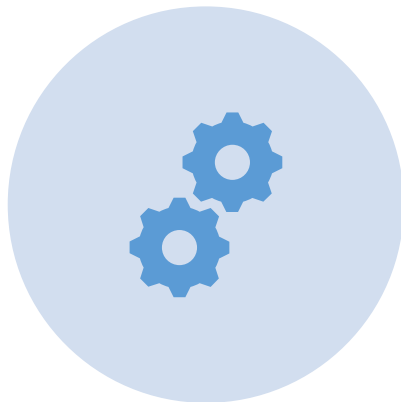

Consulting

A three-fold approach lays down the foundation for this implementation

NEW DSO TOOLS TO ENABLE NEW
SERVICES AND IMPROVE SYSTEM
OPERATION

OPEN AND COMMON RULES FOR
DATA EXCHANGE AND FLEXIBILITY
SERVICES

CONSUMER EMPOWERMENT,
INNOVATION, AND EUROPEAN
INDUSTRY COMPETITIVENESS

What entity should manage the UMEI (and other opensource) after project completion?

EU Universal UMEI

The UMEI: universal, adaptable, interoperable and fast and easy to implement

Not a platform but a set of open rules (API specification)

Available for any system and market operators on:

- euniversal.eu/the-umei
- github.com/euniversal/umei-api-specification

Modular and Adaptable – Process groups

(REST APIs containing CRUD operations)

 Baseline	 Order	 Meter Reading	 Market	 Portfolio	 Trade
Managing portfolio baselines Used by FSPs to manage baselines on the market platform.	Manage Market Orders Used by the DSOs and FSPs to execute orders' related operations in the market platform.	Manage Meter Readings Used by the DSOs to manage metering data submission both to the FMO and the FSP.	List All Markets Used by market participants to retrieve the available markets.	Manage Portfolios Used by FSPs to submit and manage portfolio on the market.	List Market Trades Used by market participants to retrieve the market trades.

Being tested in three demonstrations
